

How can Creative Therapy Consultants help?

We perform a professional health assessment resulting in a complete, unbiased report on Joe's condition. Now everyone is clear on how the injury affects his work, home, and leisure activities.

Assessment Services

Cognitive Functional Evaluation (CFE)

This process yields a comprehensive profile of the clients' cognitive strengths and weaknesses in his daily life and work activities.

Functional Capacity Evaluation (FCE)

When no cognitive issues have been detected (brain injury or concussion), we rely on FCE as the baseline assessment.

Cost of Future Care Report (CFC)

Designed to detect the costs of assistive devices and medical services for your client.

Case Management Services

With the changing insurance environment, some insurance companies no longer provide as much rehabilitation for your clients, you may want to consider hiring an occupational therapist to manage their care.

Creative Therapy offers incredibly experienced therapists throughout rural BC, who can attend to the needs of local patients.

Our services include:

- ▶ Homemaking assessment and needs
- ▶ Occupational therapy assessment and recommendations
- ▶ Case management
- ▶ Functional screen
- ▶ Home visits
- ▶ Ergonomic consultations
- ▶ Graduated return to work planning

The Creative Advantage

- ▶ Local evaluation to reflect true costs
- ▶ Engaging our clients at home if they are unable to visit our clinic in Kelowna
- ▶ Covering a large number of communities across BC
